

Marion Health Rehabilitation Program

Sharing Our Outcomes for 2021

We are extremely proud of the number of our patients who have increased their independence in our inpatient rehabilitation program. Changes in independence are measured using the Quality Indicators (QI), which helps assess how well patients can manage daily tasks such as dressing and grooming.

Patients are measured when they arrive (admission) and throughout their stay in inpatient rehabilitation. By the time patients leave the rehab program (discharge), we expect an increase in QI in the range of 30 to 50 points. While our overall target is 45, an average of 43.9 QI change was achieved. Below is information on the types of patients we see, their length of stay in the program, and their discharge destinations.

 Diagnosis	Number of Those we Served	Average Length of Stay (days)	Discharge Rate to Home or Community Setting	Discharge Rate to Skilled Nursing	Unplanned Transfers to Acute Care
Cardiac	11	6.5	63.6%	9.1%	27.3%
Multiple Trauma	5	10.2	80%	0%	20%
Neurological	76	10.3	72.4%	19.7%	7.9%
Brain Injury	28	10.1	78.6%	17.9%	3.6%
Orthopedics	29	12.6	86.2%	13.8%	0%
Spinal Cord Injury	5	12.0	100%	0%	0%
Stroke	52	13.0	76.9%	15.4%	7.7%
Amputation – Lower Extremity	1	19.0	100%	0%	0%
General Rehabilitation	63	7.85	88.9%	6.3%	4.8%
ALL PATIENTS ALL DIAGNOSES	270	10.5	79.6%	13.7%	6.7%
	Total Patients Served	Average Age	% Male	% Female	Average Number of Treatment Hours/Day
All Patients & All Diagnoses	270	74.4	44.8%	55.2%	3/day

Patient Satisfaction:

Patients who responded to our survey consistently rated our services at 60.98% for overall Patient Satisfaction. We continue to improve our data collection for patient satisfaction and encourage all our patients to complete the survey sent to them. For 2022, we have also added satisfaction questions to our patient call backs.

Our greatest achievements are in preparing our patients to return home or to a community setting, 79.6% achieved this successfully!

Marion Health Rehabilitation Individualized Information & Disclosure**YOUR CARE:**

Your program will include individualized frequency and intervention by the following disciplines. An approximate plan will include:

- **PT: _____ minutes per day for strengthening and mobility;**
- **OT: _____ minutes per day to work on self care skills: bathing, dressing, grooming, & eating**
- **ST: _____ minutes per day to help with difficulties in thought processes, swallowing & speaking**

A combination of these services will be provided at least 3 hours per day, usually in the morning and afternoon. Lunch and rest period are at mid-day. Based on your needs, you may receive additional therapy on the weekends. In addition, other therapeutic services may include: Recreation activities and Education classes.

You will be seen by a physician specializing in Rehabilitation Medicine. The hospital has 24-hour physician on call coverage and consulting specialists are available if needed. Rehabilitation Nursing will also be provided around the clock.

Your estimated length of stay at Marion Health Rehabilitation Unit will be 10 days.

Alternative Resources:

Your discharge from rehab will be facilitated by a care coordinator who will help identify and arrange for any individualized services that may be required upon discharge. These may include:

- Durable medical equipment (DME), prosthetics and orthotics
- Skilled nursing facilities where therapy at a less intense level is offered with 24-hour nursing care.
- Home health services, outpatient services, caregiver services
- Counseling for depression, adaptation to disability, substance use, and other needs
- Support groups / peer support

What you will need to bring:

- Loose fitting pants/shorts (sweat suits or gym shorts are often worn) and shirt/blouses
- Tennis shoes or walking shoes (non-skid soles)
- Socks, underwear, and toiletries
- Coat or jacket (depending on time of year) for outdoor training or enjoying the garden/courtyard
- Healthcare directive if one has been established.
- Personal health Record if one has been established.

Visiting Hours:

Since a large portion of the day is spent in therapy, visiting hours are tailored to allow for uninterrupted sessions with limited distractions. General visiting hours are 4 p.m. to 8:30 p.m. Monday through Friday, and noon to 8:30 p.m. on weekends and holidays. A primary caregiver may stay with the patient around the clock and will observe and /or be involved in therapy on scheduled days. There are no age restrictions for visitors.

Your hospitalization costs may be covered by:

Medicare Part A: Pays for the cost of inpatient rehabilitation provided you meet criteria at admission and during your stay. Your out-of-pocket expenses include a deductible for inpatient hospital stays and daily coinsurance for continuous inpatient stays lasting longer than (60) days, (61st through 150th day). For more specific coverage, visit Medicare's website at www.CMS.hhs.gov or ask to speak with your case manager. Your rehabilitation stay at this facility will be covered under the hospital level benefit. The Medical Director will make the decision whether you meet admission criteria, but it is always subject to review from Medicare.

Currently you have ____ Medicare days at 100%, ____ days at 80% and ____ lifetime days available.

Medicaid: INDIANA: If approved, Medicaid will cover many medically necessary services. Since there may be different levels of coverage depending upon financial qualifications, you will need to contact the State Medicaid Office to determine if any coverage limitations apply to you.

Private Insurance/ Indemnity/ Medicare Supplement/ HMO/PPO/Managed Medicaid/Worker's Compensation / etc.: As a courtesy to you, we will usually call a representative from your insurance plan and try to determine whether the services you are seeking will be covered. Benefits will be verified prior to admission and a designated staff member will obtain pre-authorization if required. You will need to inquire about benefits for inpatient rehabilitation at a hospital level of care. Throughout your stay, as required, your case manager will work with your insurance to obtain continued authorization. If requested, a financial counselor is available to assist you and your family in understanding your benefits, co-payments, and responsibilities before or after admission

Insurance: _____ Phone Number: _____

Verification has been obtained, and you have _____ authorized days. Co-pay information is as follows: _____.

This is not a guarantee of payment or of the coverage your plan will provide. We make every effort to obtain accurate information, but you should contact your provider representative to personally verify your coverage.

The Marion Health Rehabilitation Unit and Hospital Information and Disclosure document has been provided to you for general informational purposes.

Inpatient Rehabilitation Program At Marion Health Program Information for 2020

Welcome to Marion Health Rehab. Our 18-bed acute inpatient rehabilitation unit is designed to meet your medical needs through expert rehabilitation care. With the help of our rehabilitation team and the support of your family and other loved ones, you will develop new skills and re-learn previous skills that were affected by illness or injury.

We will work closely with you and your family during your stay here with the goal of sending you home or to the most appropriate placement. To help you recover as fully as possible, it is important for you and your family to understand our rehabilitation program and your treatment.

This guide explains our services and provides information on the types of patients we serve. It also includes details of your individual treatment and payment information that will help you understand what to expect while you are in our rehabilitation program and when you are ready to go home. Your feedback is one of the keys to our success and your recovery. Please share with us how we can make your rehabilitation stay as meaningful and rewarding as possible.

MISSION Statement:

The goal of the Marion Health Rehabilitation Hospital is to be the leader in rehabilitative services in our community. Our commitment to compassionate and effective therapy is to enhance the lives of our patients and return them to functional independence. We strive for our interdisciplinary team to provide high quality medical care with evidenced based practices to maximize patient functioning, and coordinate resources for patients upon discharge.

Our COMMITMENT to You:

It is the policy of the Rehab Unit that all team members will act in a manner consistent with the mission, philosophy and operating policies of our program.

In accordance with these principles and policies, team members will:

- Show respect for the dignity of the individual whether patient, family member, visitor, co-worker, client or any other person
- Provide the highest quality clinical and customer related services
- Demonstrate fairness and honesty in all interactions with the public
- Adhere to their professional codes and practice guidelines
- Provide an accurate portrayal of the services and outcomes of the program
- Be ethical in all marketing and public relations activities.

Referral Sources:

We receive referrals from the geographic area of Fort Wayne, Indianapolis, and from the surrounding acute hospitals, long term acute care hospitals (LTACH), skilled nursing facilities, home health agencies, outpatient centers, physicians as well as self referrals.

Methods Used To Assess And Meet Patient Needs:

We perform a pre-admission screening prior to admission to assess your current status and your goals when you leave our program. It is important to understand each patient's medical, physical, and mental condition, as well as any restrictions (social or cultural), to develop the best treatment plan.

A patient's psychological status is also considered when determining whether he or she could benefit from admission. The rehabilitation Medical Director on our unit will review the pre-admission assessment in order to make a decision to approve or deny the referral prior to admission and the decision will be communicated to the referral source, patient and family/support system. If the referral is determined to be ineligible, recommendations will be made for alternative services.

Conditions Treated:

The rehabilitation program serves patients with a variety of medical, physical, and functional needs. Some of the conditions treated in the program include:

- Stroke
- Spinal Cord Injury
- Amputation
- Brain Injury
- Guillain-Barre
- Hip Fractures
- Joint Replacements
- Multiple Trauma
- Cardiac or Pulmonary Disorders
- Myopathy
- Progressive or Degenerative Neurological Disorders:
 - Multiple Sclerosis
 - Muscular Dystrophy
 - Parkinson's Disease

Admission and Continued Stay Criteria:

- Patient must be medically stable
- Patient must be able to tolerate an intensive rehabilitation therapy program consisting of three hours of therapy per day at least five days per week or consist of at least 15 hours of intensive rehabilitation therapy within a seven consecutive day period, beginning with the date of admission
- Nursing care must be required 24 hours a day
- Patient must require two or more therapies, one of which will be physical or occupational therapy, as well as a coordinated interdisciplinary approach to his or her rehabilitation
- Patient must have experienced a functional decline

- Patient must have potential for improvement
- Patient must be cooperative and motivated
- Patient must require supervision by a rehabilitation physician to assess the patient both medically and functionally and to change the course of treatment if necessary.
- Patient must have a pay source or an arrangement with our financial department prior to admission

Discharge and Transition Criteria:

Our team works with you, the patient, and your family to ensure the most appropriate placement following discharge from the Acute Rehabilitation Unit. When the patient's medical condition allows, the patient and family will be notified at least one week in advance of the pending discharge by the care coordinator.

Discharge from the program shall be considered when one or more of the following criteria occur:

- A patient has reached his/her rehabilitation potential and no longer warrants the intensity of therapy services.
- A patient makes no progress in any area of therapy in more than five days.
- A patient is medically unstable requiring more intensive medical intervention.
- A patient is behaviorally unable to cooperate with the demands of the program or is jeopardizing his/her own safety or that of other patients and or staff.
- A patient refuses to participate in the program for 48 hours, despite being medically stable, and there is no evidence of progress.

Non-Voluntary Discharge:

- If you are unable to complete your rehabilitation program because of the intensity of the services, which includes a minimum of three hours of combined therapy at least five days per week, our care coordinator, Shelley, will assist in finding placement in a less intensive setting to continue services.

Services Provided: (All services are provided directly unless noted to be by contract or referral)

- | | | |
|---|-------------------------------|-----------------------------|
| • Rehabilitation Medicine | • Activity Programs | • Respiratory Services |
| • Medical Consults (by referral if necessary) | • Social Work/Case Management | • Dietary Services |
| • Rehabilitation Nursing | • Orthotics / Prosthetics | • Wound Care |
| • Physical Therapy | • Occupational Therapy | • Home Evaluations |
| | | • Speech/Language Pathology |

Medical, diagnostic, laboratory, and pharmacy services are also available here at Marion Health. The response time is specific to each of these services. It is the expectation of this unit, however, that the vast majority of orders or consultations will receive some level of response within 24 hours of receipt. This doesn't include critical orders, which receive prompt attention. That initial response will then be conveyed to the appropriate clinician(s) as soon as possible.

Scope of Wound Care

Our program includes the care of nurses certified in wound care. The goals of our program are to prevent complications or deterioration of an existing wound, to promote healing, and to identify the need for a wound clinic referral. Nursing staff will consult the wound clinic based on the following clinical evaluations: non-healing wounds, infection with elevated WBC, draining wounds, wound vacs, atypical wounds, burns, diabetic wounds, or any other abnormalities based on the nurse's clinical judgement. Our nursing case manager will assist in setting up follow up care if needed for any further treatment warranted.

OUR SERVICES

Comprehensive inpatient rehabilitation services are provided to adult patients with neurological and other medical conditions who have experienced a loss of function in activities of daily living, mobility, cognition, or communication. This program serves persons 18 years and older and is open to people of all cultures and from all payer sources. Our patients have an illness or injury that requires an ongoing hospital stay but are stable enough to participate in therapy.

Persons served will receive 24-hour rehabilitation nursing and a minimum of three hours a day of therapy a day, no less than five out of seven days in the week. Your therapy program, including the frequency, intensity and length of stay, will be designed according to your needs after you have been fully evaluated. Hours for therapy services are normally provided from 7:00 am to 5:00 pm. Our unit's tracking indicates our patients receive, on average, 3 hours of therapy per day.

When you complete your rehabilitation program, the team will work with you and your family to help determine if it is safe for you to return home. If you are unable to return home after discharge, the team will assist you and your family in making other arrangements.

Restrictions of our Program:

Our program does not accommodate anyone under the age of 18, ventilator-dependent patients, patients who are non-responsive or unable to follow commands, those who have severe dementia, patients who wander excessively, are combative or have behavioral dysfunctions. Spinal cord injuries are subject to physician approval and could be restricted in injuries inferior to C5. We can treat spinal injuries whether complete or incomplete, traumatic or non-traumatic. We do not accept patients with severe burns, those who have unstable labs, or patients requiring hemodialysis. If our services are unable to meet the needs of a patient referred, recommendations for alternate services will be provided.

Insurance and Payment Sources:

Medicare and your supplemental secondary insurance (if you have one) will cover most services provided during your inpatient rehabilitation stay, as long as you meet the admission and continued stay criteria. The Medical Director will evaluate whether you meet these criteria, but this is always subject to Medicare review. If you have other types of insurance, your benefits will be verified before admission. If there are limitations identified in your coverage, your case manager will discuss these with you, as well as alternative resources to help meet your needs.

Out-of-pocket expenses that you may incur depend upon your specific insurance coverage, co-payments, benefits and eligibility. Some patients may need to purchase durable medical equipment (wheelchair, walker, commode, etc.) as this equipment may not be covered by a particular insurance plan.

Assistance with Financial Responsibility:

A financial counselor is available to assist you and your family in understanding your benefits, co-payments, and responsibilities before or after admission. If you are paying cash or need assistance or information, please contact a patient services representative in the business office @ 765-660-6000.

General Information:

- **Discharge against Medical Advice (AMA):** Competent patients, and those with legal guardians or active durable power of attorney for health care, have the right to leave the hospital against medical advice. In that event, the physician will inform the patient of the potential risks. The patient, guardian or durable power of attorney for healthcare will then sign a release of liability for leaving against medical advice.
- **Security of Personal Possessions:** Patients are encouraged to leave valuables at home. The hospital cannot be responsible for lost or stolen items. If such items are brought with the patient, he/she is encouraged to have nursing staff place them in the safe located in the security office, during business hours.
- **Patient Rights:** The persons served, families, friends, caregivers and community have the right to respectful, considerate care from all rehabilitation members they interact with at all times and under all circumstances. All individuals served will have freedom from abuse, financial exploitation, retaliation, humiliation, and neglect. We do not discriminate based on race, ethnicity, national origin (including language), spiritual beliefs, gender, age, current mental or physical disability, sexual orientation, or socioeconomic status. A copy of Patient Rights is available, as well as posted for viewing on the unit.
- **Rights with Regard to Advanced Directives per Policy:**

It is the policy of Marion Health to allow all adult individuals over the age of 18 with decision making capacity to participate in decision making concerning their health care and medical treatment. Advance directives shall be followed by the Hospital to the extent permitted and required by Indiana Law.

There may be personal reasons why individuals choose to execute or not execute advance directives concerning their health care and medical treatment. This Hospital does not condition the provision of medical care, or otherwise discriminate against an individual, based on whether or not an advance directive has been executed.

Marion Health is committed to educating its employees, as well as the community, on issues concerning, or refusal of medical treatment. All patients, upon admission to Marion Health will be asked if they have an advanced directive. All existing advance directives will be reviewed and/or updated upon admission to the Hospital.

Current Accreditations

If there is a need for any clarification regarding the plan of care, please notify any staff member. If you have any questions or concerns regarding the program OR if you are not satisfied with your care, please ask to speak to a manager or the director. (If you have concerns that cannot be resolved, we can provide you a copy of our Grievance policy and assist you with the grievance process.)

If you have questions or concerns, please call
